## **Orange Sky Golden Harvest Made An Alliance With Synergis To Identify Prime Locations For Its Premium Quality Multiplexes**

3 November 2011, Hong Kong - Orange Sky Golden Harvest Entertainment (Holdings) Limited (OSGH or the Group; HKSE: 1132) is delighted to announce that OSGH has entered into a strategic agreement with Synergis Management Services Limited (Synergis), under which Synergis will search for optimum locations for OSGH's high-end multiplexes.

OSGH has devoted to develop its theatrical business in the Mainland China in the recent years. We are dedicated to operate premium quality multiplexes while Synergis has actively involved in pre-management consultancy and asset management services in relation to prominent shopping malls, commercial centres and high-end residential projects in the Mainland China. The partnership between OSGH and Synergis enables OSGH's premium quality multiplexes to position with the properties being run by renowned international and local property developers and property investors. said Mr. Andrew Mao, Executive Director and Chief Executive Officer of OSGH.

Mr. Mao added, the strategic agreement not only allows OSGH's multiplexes to present at more prime locations and properties, but also accelerates the Group's expansion in the Mainland China. This is a critical step forward for the Group to become Asia's best-in-class integrator of the movie entertainment industry.

In alignment with the cultural promotion initiatives of the Chinese government and to seize the opportunity to become the master of fast-paced movie market, OSGH doubled its efforts in its business development and scales in the Mainland China. The Group has performed a dramatic increase in its multiplex numbers, from 9 in 2010 to approximately 30 by end of 2011. The Group is one of the most rapidly-developing organizations in cinema operations and is striving to be the leading theatrical company in China and to become the largest integrator of theatrical exhibition in Asia. With the increase in number of new multiplexes spreading out in
